

PHAN DUY QUANG

DATABASE ADMINISTRATOR

+84 856 726 686 • working.duyquangphan@gmail.com • Hanoi, Vietnam

SUMMARY

Database Administrator (DBA) with over a year of hands-on experience across banking, government, and healthcare systems, on both cloud and on-premise environments. Focused on building and operating stable, scalable database systems with high availability — proactively detecting issues early and resolving them promptly to ensure customer satisfaction.

SKILLS

Database Administration

- Oracle Database administration, patching & version upgrades
- Data migration (Data Pump, RMAN backup/restore)
- Backup & Recovery (RMAN, Flashback Restore Point)

High Availability & Replication

- Oracle RAC
- Oracle Data Guard (Single-Single, RAC-Single, RAC-RAC)

Performance Tuning & Optimization

- Monitoring waits, locks & blocking sessions
- Execution plan analysis
- Indexing & partition strategies
- System parameter tuning

Infrastructure & Automation

- Linux administration (Oracle Linux, CentOS)
 - AWS Cloud (basic)
 - Shell/Bash & SQL scripting
 - Task automation with cron jobs & DB scheduler
-

WORK EXPERIENCE

Wecommit Vietnam Technology Co., Ltd

Feb 2025 – Present

Oracle Database Administrator

- Deploy and administer Oracle Database systems, including primary and real-time standby (Data Guard: Single-Single, RAC-Single, RAC-RAC).
 - Handle daily administration, health checks, and incident support for customer Oracle Database and RAC systems.
 - Operate Oracle systems on AWS Cloud, ensuring continuous, stable service.
 - Administer Linux — users, permissions, partitions, LVM storage expansion.
 - Design and run scheduled RMAN backups.
 - Support a Core Banking upgrade — data migration and version upgrade from Oracle 11g to 19c.
-

KEY PROJECTS

Core Banking Oracle Database upgrade (11g → 19c)

Vietnam Bank for Social Policies (VBSP) — Sep 2025 – Present

- Contributed to the Core Banking Oracle Database upgrade from 11g to 19c.
- Helped design the database migration plan; performed backup/restore and Transportable Tablespaces tasks.
- Monitored and reported system status daily; supported incident resolution.

Supporting Oracle databases during the securities core-system upgrade

Hanoi Stock Exchange (HNX) — Sep 2025 - Present

- Deployed Oracle Data Guard standby systems.
- Monitored, reported, and handled incidents across the system.
- Proposed SQL query and system parameter optimizations.

Oracle Database deployment & migration

Intellectual Property Office of Vietnam (IPVN) — Nov 2025 - Dec 2025

- Deployed Oracle Database systems along with Data Guard standby environments.
- Built scheduled backup routines using RMAN and Data Pump.
- Supported incident resolution and system parameter tuning.

Oracle Data Guard deployment on AIX

Vinatti — Apr 2026

- Deployed Oracle Data Guard standby systems on AIX.
- Supported switchover operations between primary and standby environments.

Hospital database operations support

OneNet — Nov 2025 - Present

- Monitored and supported database operations for multiple hospital systems.
- Built scheduled data backup routines.
- Proposed SQL query and system parameter optimizations.

Hospital Oracle Database administration

Nguyen Dinh Chieu Hospital (Ben Tre) — Sep 2025 - Dec 2025

- Operated and administered Oracle Database, keeping primary and standby systems stable.
- Built scheduled backup routines using RMAN and Data Pump.
- Supported routine maintenance and incident resolution.

EDUCATION

Hanoi Open University

Major: Information Technology

Oct 2021 - Oct 2025

CERTIFICATION

TOEIC 750 (Listening & Reading)
